

Amro A. Abdalla

aaa654@georgetown.edu • amroadel.github.io

Education

- Georgetown University** Aug 2025 – May 2027 (expected)
Ph.D. in Computer Science Washington DC, USA
 - Research Advisor:** Prof. Sarah Adel Bargal
 - Research Interests:** Computer Vision, Multi-modal Learning, AI Safety & Alignment, World Modeling
 - Awards:** Fritz Family Fellowship • Best Teaching Award, Spring 2025
- Georgetown University** Aug 2023 – May 2025
M.S. in Computer Science Washington DC, USA
 - GPA:** 3.9/4.0
- The American University in Cairo (AUC)** Feb 2017 – May 2022
B.Sc. in Computer Engineering Cairo, Egypt
 - Awards:** Honors (Cum Laude), Dean's List, Full Merit-based Scholarship from Al Ghurair Foundation
 - Minors:** Mathematics, Business Administration
 - Major GPA:** 3.6/4.0

Selected Graduate Courses

Deep Learning • Computer Vision • Empirical Methods in NLP • Data Science • Big Data and Cloud Computing
• Human Centered CS • NLP Seminar

Papers

- Abdalla A**, Shaheen I, DeGenaro D, Mallick R, Raita B, Bargal SA. (2025) GIFT: Gradient-aware Immunization of diffusion models against malicious Fine-Tuning with safe concepts retention [arXiv preprint arXiv:2507.13598, 2025](#) [*In submission*]
- Cretu A, Kireev K, Obinna W, **Abdalla A**, Bargal SA., Redmiles E, Troncoso C. (2025) Evaluating Concept Filtering Defenses against Child Sexual Abuse Material Generation by Text-to-Image Models [*In submission*]
- Mallick R, **Abdalla A**, Bargal SA. FaithFill: Faithful Inpainting for Object Completion Using a Single Reference Image. (2025) [arXiv preprint arXiv:2406.07865, 2025](#). [*In submission*]
- Cui, C., **Abdalla, A.**, Wang, D., Solberg, S., Bargal, S.A. (2024). Large Language Models for Career Readiness Prediction. AIED 2024. DOI: [10.1007/978-3-031-64315-6_26](#) [*Nominated for best poster award*]

Industry Experience

- Dell Technologies** Oct 2022 – Aug 2023
Data Scientist - R&D Team Cairo, Egypt
 - Co-inventor on two patent applications for applying ML to optimize 5G network operations.
 - Developed ML algorithms for intercell interference detection in 5G networks, improving detection accuracy.
 - Mentored two teams in Dell's *Envision the Future AI Competition*; one placed 1st in the 2022–2023 META region.
- Dell Technologies** Mar 2022 – Oct 2022
Data Science Intern - R&D Team Cairo, Egypt
 - Built and evaluated ML models for 5G admission control, achieving a 12% performance improvement over fixed threshold-based methods.
 - Curated and analyzed data from Network Simulator 3 (ns-3), generating visual insights to inform model development.
 - Led the end-to-end planning and execution of Dell's annual *HackTrick* hackathon for professionals and students.
- Siemens EDA (Mentor Graphics)** Aug 2021 – Oct 2021
Software Development Intern Cairo, Egypt
 - Developed a C-based parsing tool for Siemens' proprietary UCDB database using UCDB APIs and the `libxml` library to export structured XML and text representations.
 - Integrated the tool into Siemens' internal workflows, enabling automated analysis and downstream processing.

- The American University in Cairo

Research Intern - Systems Lab

- Built a stack unwinding library for NileOS, a distributed microkernel OS for high-performance applications, using C, C++, and x86 assembly.
 - Designed a g++-compatible exception handling framework integrated with NileOS.

Jan 2020 – Jun 2020

Cairo, Egypt

Teaching Experience

- Georgetown University

Graduate Teaching Assistant - COSC 3470: Deep Learning

Feb 2025 - Current
 - Georgetown University

Graduate Teaching Assistant - COSC 3510: Intro to Databases

Aug 2024 - Dec 2024
 - The American University in Cairo

Teaching Assistant - CSCE 4604: Practical Machine Deep Learning

Aug 2021 - Dec 2021

Projects

- PaliGemma:** Implemented a multimodal (vision-language) model from scratch using Python and PyTorch, including custom transformer architecture, image-text fusion, and end-to-end training pipeline. It combines the SigLIP vision encoder and the Gemma language model. It was introduced by Google DeepMind
- Garment Is All You Need:** Developed an inference pipeline using diffusion models and IP-adapters to generate personalized fashion model images, enabling customization through text prompts and portrait inputs.
- Custom AI Assistant with Retrieval-Augmented Generation (RAG):** Built a legal AI chatbot with Llama 2, FAISS, and LangChain, supporting file uploads, web search, and contextual queries.
- Analyzing U.S. Crime Patterns:** Curated and analyzed U.S. crime datasets using statistical methods, clustering, and topic modeling, and developed an interactive website with Plotly to showcase trends and insights.

Talks

- Dsquares Tech Meetup

Generative AI in Vision

- Delivered a talk on Generative AI in Computer Vision for industrial use cases, including fashion modeling, at Dsquares' tech meetup featuring tech leaders and academics.

Aug 2024

Cairo, Egypt
 - Dell Technologies Hackathon

Explainable AI in 5G Networks

- Presented on explainable AI in 5G applications at Dell's annual hackathon for students and professionals.

Feb 2023

Cairo, Egypt

Skills

Programming: Python, C/C++, SQL
Software tools: PyTorch, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, Git, Linux
